## Projects

<b>CodeExa</b> 📄 <i>a platform for conducting online exams</i>	React.js
<ul style="list-style-type: none"><li>• Built a full-stack web platform to conduct coding exams with test case validation</li><li>• Integrated student login, AI-generated questions, and a full-screen code editor</li></ul>	
<b>Park Point</b> 📄 <i>Smart Parking Tracker App</i>	Flutter, BLoC
<ul style="list-style-type: none"><li>• Designed a mobile app to mark and track parking locations in real-time</li><li>• Used compass rotation and location APIs to guide users back to parked vehicles</li></ul>	
<b>Phishguard</b> 📄 <i>Phishing Link Detection Browser</i>	Flutter, Python
<ul style="list-style-type: none"><li>• Developed a secure mobile browser that detects phishing links using real-time URL analysis</li><li>• Compares incoming links with known phishing patterns and blocks malicious pages</li></ul>	
<b>EazyGo</b> 📄 <i>Public Infrastructure Issue Reporting System</i>	Flutter, Firebase
<ul style="list-style-type: none"><li>• Created a citizen-facing app to report road, utility, and infrastructure damages directly to authorities</li></ul>	

- Enabled real-time complaint submission, status tracking, and action history
